

Yaroslav Kurilin

Front-end developer

✉ yaroslav.kurilin.wedev@gmail.com 📍 Zaporizhzhya, UA, Ukraine

Summary

I am a front-end developer with around 10 years of experience specializing in building CRM and SaaS platforms, corporate websites, and landing pages. My core technologies include React, Vue, Angular, Svelte, Next.js, Redux, TypeScript, and Tailwind. I also have experience working with GraphQL, REST APIs, gRPC and data visualization using Chart.js and D3. Focused on result.

Selectively apply AI-assisted development tools, including Cursor and Claude Code, combined with context engineering practices to optimize productivity and maintain high code quality.

I strive to deliver not just completed tasks but functional and user-centric products. The best validation of my efforts is seeing my work go live and perform as expected.

Experience

Front-end developer

Calaton Systems

Nov 2025 - Feb 2026

remote

Developed and maintained financial CRM/SaaS systems.
